

SPRING 2020 EDITION

Use these links to learn more about Orchard's cloud services, along with the team bringing the Orchard to the cloud. Read about our available system administration and service levels that allow us to help support you, so you can focus on patient care. You can also review tips for using Orchard Collect and for adding linked documents throughout Orchard's suite of products. Don't miss the updates on Orchard's training schedule for 2020 and on exciting changes coming to our product release notes. Follow the links to Orchard's webinars, white papers, and blog, including a post about how Orchard is working with universities of all sizes to help students return to campus safely. In light of the pandemic, Orchy@ is sharing hints on some places he has visited in the past—can you tell where in the world Orchy was?

CATCH UP WITH ORCHARD

COVID-19 vs. Higher Education

Orchard Software is partnering with universities to help them manage COVID-19 testing by implementing software solutions that streamline processes, improve testing workflows, and provide connectivity for rapid reporting.
