## The Results Interface (Outbound)

### ORU event (R01) – Unsolicited Transmission of an observation message

The ORU message (unsolicited transmission of an observation message - event R01) is used to send the results of lab orders from Orchard back to the host system. Each ORU message has at least one OBR segment and at least one OBX segment. Default message contains one ORC with one or more OBR segments.

Orchard uses the segments and non-shaded fields listed below. Field lengths are shown for fields that differ from HL7 data type field lengths.

{ } Indicate repeating segments

[ ] Indicate optional segments

Message Segments	Segment Name	Comments
MSH	Message Header	
PID	Patient Identification	
{{NTE}}	Notes and Comments (for Patient ID)	
[PV1]	Patient Visit	
[PD1]	Patient Additional Demographics	
{ORC	Common Order	
{{NTE}}	Notes and Comments (for Order)	
[[OBR]	Observation Request (Lab Order)	
{NTE}}	Notes and Comments (for Order Choice)	
{OBX	Observation/Result	
[[NTE]]}	Notes and Comments (for Results)
